

Founder / Super Admin User Guide (Non-Technical)

This guide is for **Founder / Super Admin** users who need to manage the company inside the app. It is written in simple language so even people without a tech background can follow it.

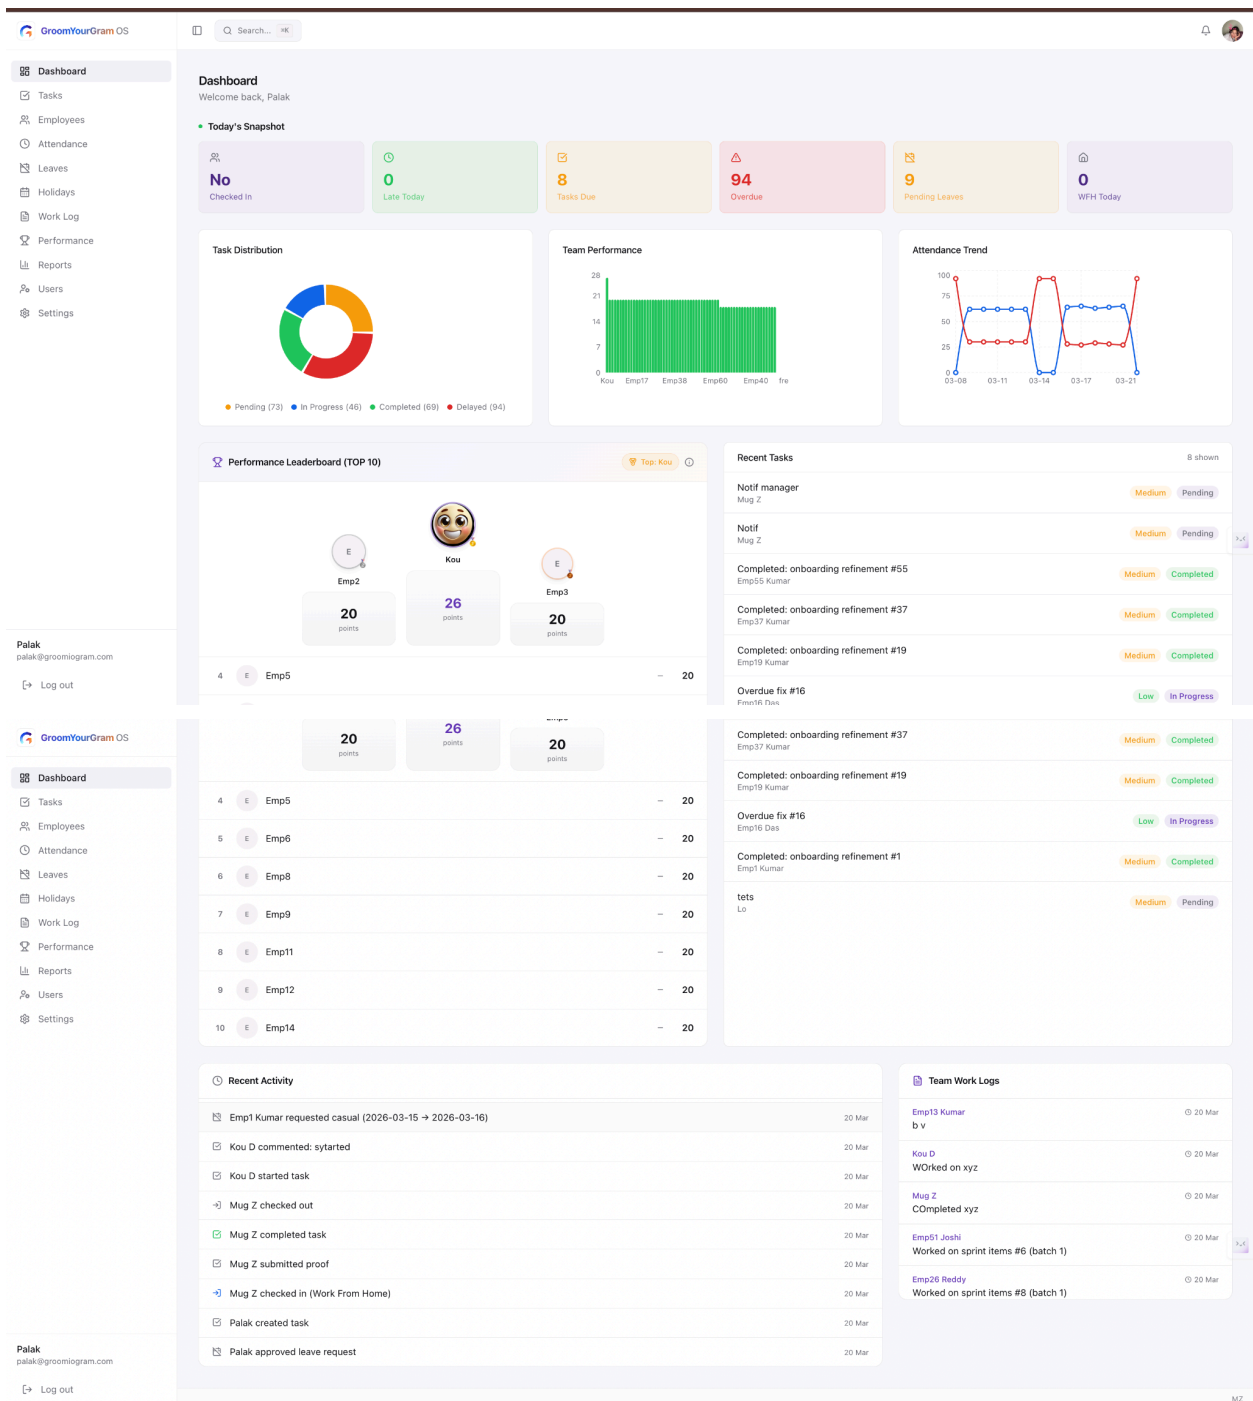

In the app, you'll usually see the role shown as "**Super Admin**" (because your backend role is called *Founder*).

1) Who can do what

1. Founder / Super Admin (you) : can manage everything needed to run the company workspace (users, approvals, settings, reports, etc.).
2. Admin / Manager : can manage employees only if they have specific permissions turned on by the Founder in Settings → Permissions .
3. Employee : can log attendance (check-in/out), submit tasks/work logs, and request leaves. They usually cannot approve or manage company-wide settings.

2) Your main dashboard (overview)

Go to: Dashboard

What you see

- Today snapshot (quick counts for tasks, attendance, and pending leaves)
- Task Distribution (Pending / In Progress / Completed / Delayed)
- Team Performance (score trend for the team)

- Attendance Trend (present vs absent over time)
- Leaderboard (who is ranking highest)
- Recent Tasks and Recent Activity
- Work Logs summary (company-wide, because you can see all)

What you can do here

- This page is mainly for monitoring . For actions, use the specific pages below (Tasks, Leaves, Work Logs, Reports, Settings, User Management).

3) Tasks management (assign, track, and guide work)

Go to: Tasks

What you can do (Founder/Super Admin)

1. Create a new task

Create Task [X]

Title
[Task title]

Description
[Describe the task...]

Priority
P2 - Medium [v]

Output Type
Link Submission [v]

Assign To
Select employee [v]

Deadline
dd/mm/yyyy [calendar icon]

Deadline time (optional)
--:-- [clock icon]

Proof Required [toggle]

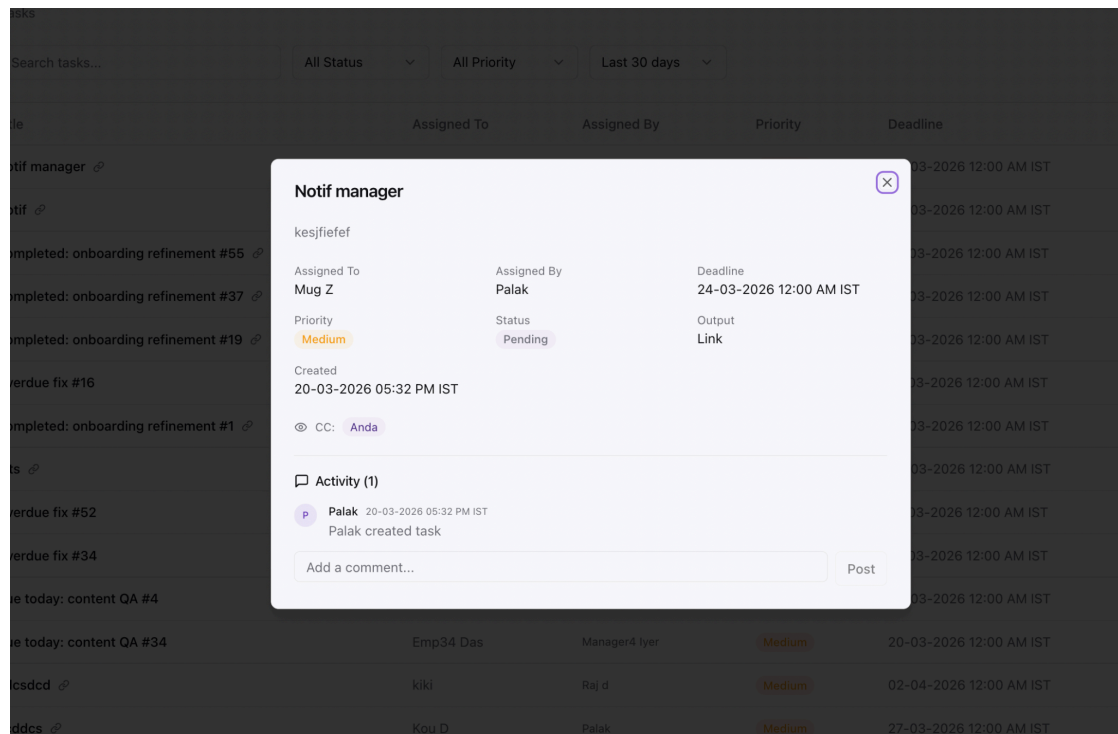

CC (Optional Visibility)
Select additional people who can view this task

☐ Anda	☐ joh
☐ kip	☐ Manager1 Singh
☐ Manager2 Gupta	☐ Manager3 Shah
☐ Manager4 Iyer	☐ Manager5 Nair

Create Task

- Click New Task
- Fill:
 - Title and Description
 - Priority (P1 High / P2 Medium / P3 Low)
 - Assign To (choose an employee/manager)
 - Deadline date (and optional time)
 - Proof required (if needed, the assignee must submit a link before completion)
 - Optional CC (additional people who can view the task)

2. View any task

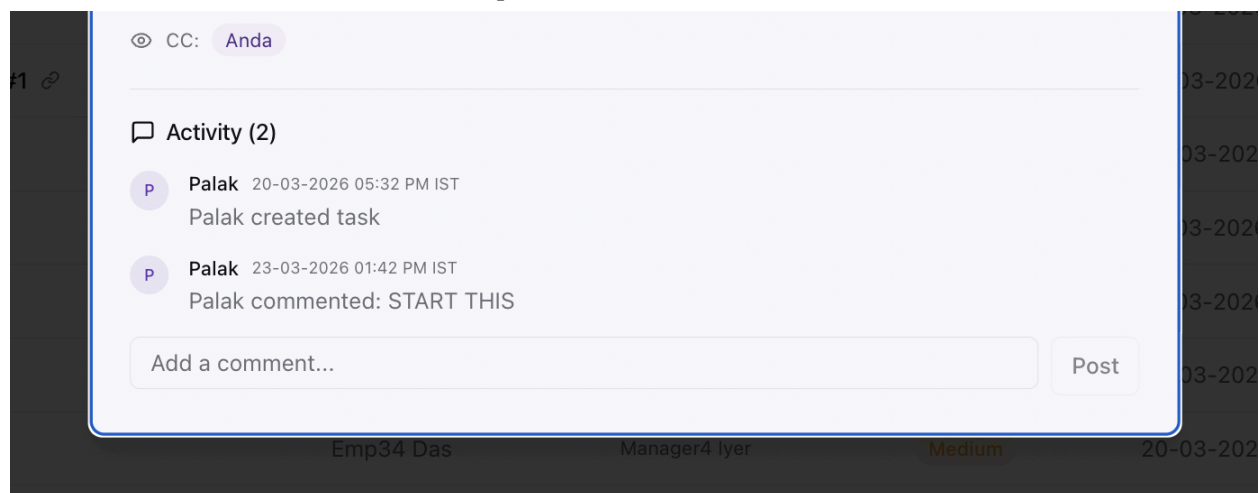

- You can open any task details to read what it's about, who owns it, and the timeline.

3. Start / Complete tasks

- You can only press Start Task / Complete when you are the assigned person for that task.

4. Add comments and track activity

- In task detail view, you can post comments and view the activity timeline.

5. Submit proof / mark complete

- Again, these actions appear for the assignee (the person responsible for the task).

Important notes

- "Proof required" helps ensure quality: completion is blocked until the assignee submits the required link.

- You can manage visibility using CC, so relevant people can follow without getting stuck in daily work.

4) Leaves (approve or reject requests)

Leaves
All leave requests

Annual Leave Limits
Casual Leave: **19 days** Paid Leave: **15 days** Sick Leave: **15 days** (Configure in Settings → Leave Limits)

Filter by employee: All Employees Month: March 2026

Employee	Type	Dates	Sent To	Status	Actions
Anda	Casual Leave	2026-03-21 → 2026-03-24	Palak	Pending	ⓘ Approve Reject
Emp1 Kumar	Casual Leave	2026-03-15 → 2026-03-16	Manager1 Singh	Approved	ⓘ
Emp21 Joshi	Paid Leave	2026-03-15 → 2026-03-16	Manager6 Singh	Rejected	ⓘ
Kou D	Casual Leave	2026-03-24 → 2026-03-27	Mug Z	Approved	ⓘ
Raj d	Paid Leave	2026-03-21 → 2026-03-26	Palak	Approved	ⓘ
Kou D	Casual Leave	2026-03-28 → 2026-04-01	Anda	Rejected	ⓘ
Kou D	Casual Leave	2026-03-25 → 2026-03-30	Palak	Rejected	ⓘ
Mug Z	Paid Leave	2026-03-24 → 2026-03-27	Abhinav D	Approved	ⓘ
Kou D	Paid Leave	2026-03-28 → 2026-03-31	Abhinav D	Approved	ⓘ
Mug Z	Casual Leave	2026-03-21 → 2026-03-23	Palak	Approved	ⓘ
Kou D	Casual Leave	2026-03-21 → 2026-03-24	Abhinav D	Approved	ⓘ
Mug Z	Paid Leave	2026-03-21 → 2026-03-24	Palak	Rejected	ⓘ

Go to: Leaves

What you can do (Founder/Super Admin)

1. See all leave requests

- Use filters like Employee and Month .

2. Approve or Reject

- For any pending request, you can press:

- Approve

- Reject

3. Open details

- Click View to see reason, dates, and notes.

The screenshot shows the GrooveTeam CRM interface. The left sidebar contains navigation links: Dashboard, Tasks, Employees, Attendance, Leaves (selected), Holidays, Work Log, Performance, Reports, Users, and Settings. The main content area is titled 'Leaves' and shows 'All leave requests'. It includes 'Annual Leave Limits' (Casual Leave: 19 days, Paid Leave: 15 days, Sick Leave: 15 days) and a table of leave requests. A modal window titled 'Leave Request Details' is open, showing the following information:

- Employee: Anda
- Type: Casual Leave
- Dates: 2026-03-21 → 2026-03-24
- Status: Pending
- Sent To: Palak
- Reason: ds
- Additional Notes: dssd
- Buttons: Approve, Reject

The background table lists leave requests with columns: Employee, Type, Dates, Status, and Actions. The status column shows 'Pending', 'Approved', and 'Rejected'.

Important notes

- Managers can approve/reject only when they have permission and when the request is routed to them.

- As Founder/Super Admin, you can approve/reject pending requests without needing those manager-specific permissions.

5) Work Logs (review work done)

Work Log
See all submitted work logs across the company

Status: All **User:** All users **Start date:** dd/mm/yyyy **End date:** dd/mm/yyyy

Work Logs (20 logs)

User	Description	Status	Action
Emp13 Kumar → Manager4 Iyer	b v	Pending	View, Mark reviewed
Kou D → Mug Z	Worked on xyz	Pending	View, Mark reviewed
Mug Z → Abhinav D	CCompleted xyz https://google.com	Pending	View, Mark reviewed
Emp51 Joshi → Manager6 Singh	Worked on sprint items #6 (batch 1)	Reviewed	View
Emp26 Reddy → Manager11 Singh	Worked on sprint items #8 (batch 1)	Pending	View, Mark reviewed
Emp1 Kumar → Manager1 Singh	Worked on sprint items #1 (batch 1)	Reviewed	View
Kou D → Mug Z	frfrfrfrf	Reviewed	View
Raj d → Abhinav D	dcsc	Pending	View, Mark reviewed
Palak → —	dfvdfvdf	Pending	View, Mark reviewed

Palak
palak@groomlogram.com
Log out

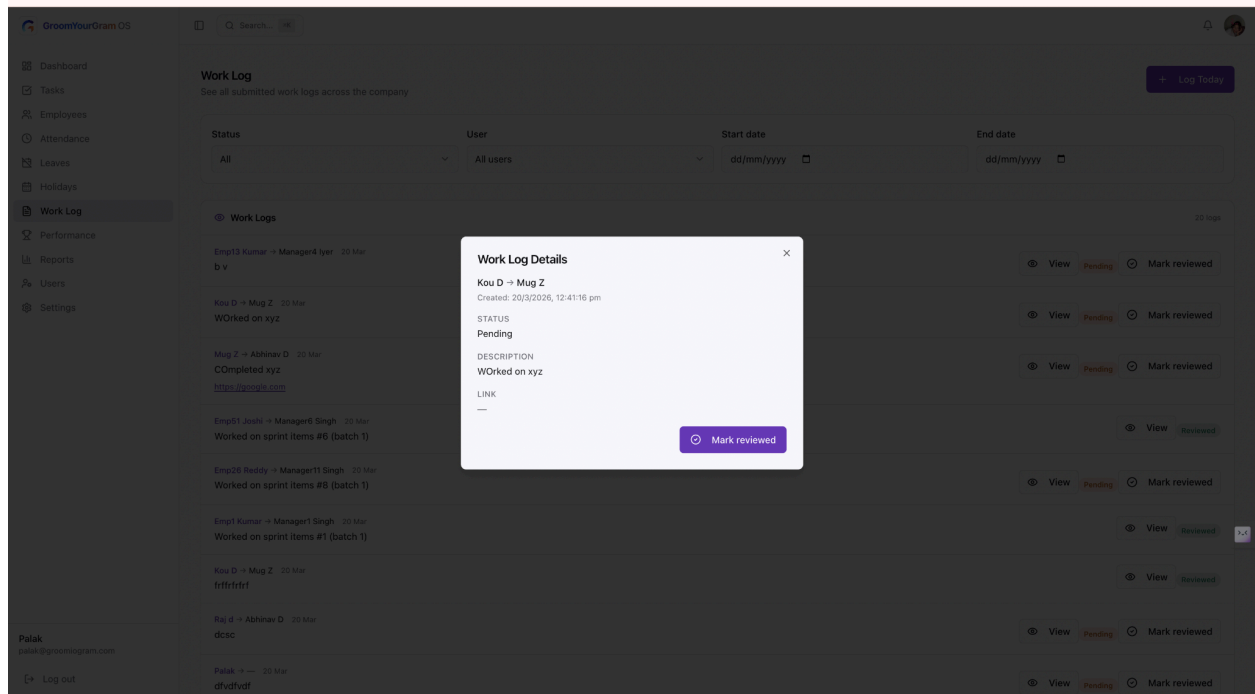

Go to: Work Log (or Worklogs)

What you can do (Founder/Super Admin)

1. Create your own work log

- Click Log Today
- Enter:
- What you worked on (description)
- Optional link
- Since you are the Founder, you typically log without "sending to manager".

2. See all work logs company-wide

- Use filters like:
- User (Founder filter)
- Status (Pending / Reviewed)
- Date ranges (start/end)

3. Mark work logs as reviewed

- For any work log that is still pending, you can click:
- Mark reviewed

Important notes

- This review step is important: it turns "pending" work logs into "reviewed" work logs for visibility and tracking.

6) Attendance (monitor everyone)

Emp57 Joshi	20-03-2026	20-03-2026 09:15 AM IST	20-03-2026 05:30 PM IST	On Time	Office

Go to: Attendance

What you can do (Founder/Super Admin)

1. View attendance logs for employees

- You can view all employees' attendance (with filters like employee and month).

2. Use the calendar view

- See attendance codes day-by-day for the selected month:

- OP = On time

- OL = Late

- A = Absent

- WFH = Work from Home

- H = Holiday

3. View analytics

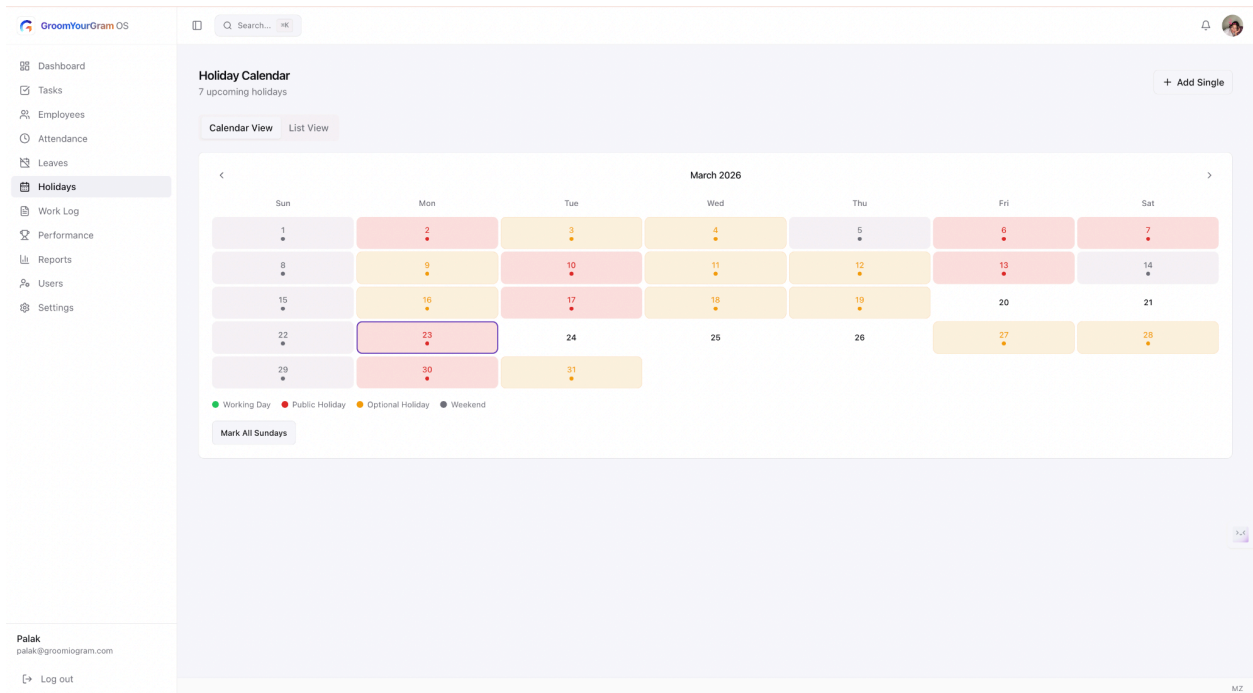

- Attendance leaderboard / punctuality insights are available on this page for Admin/Founder views.

Important notes

- Founder/Super Admin can view attendance, but the app prevents you from doing Check-in and Check-out yourself.

- If you personally need attendance entries, ask your admin/employee account to do check-in/out.

7) Holidays (maintain the holiday calendar)

Go to: Holidays

What you can do (Founder/Super Admin)

1. Add a single holiday

- Click Add Single

- Enter:

- Holiday name

- Date

- Type (Public / Optional / Weekend)

2. Add multiple holidays (bulk)

- Select multiple dates on the calendar

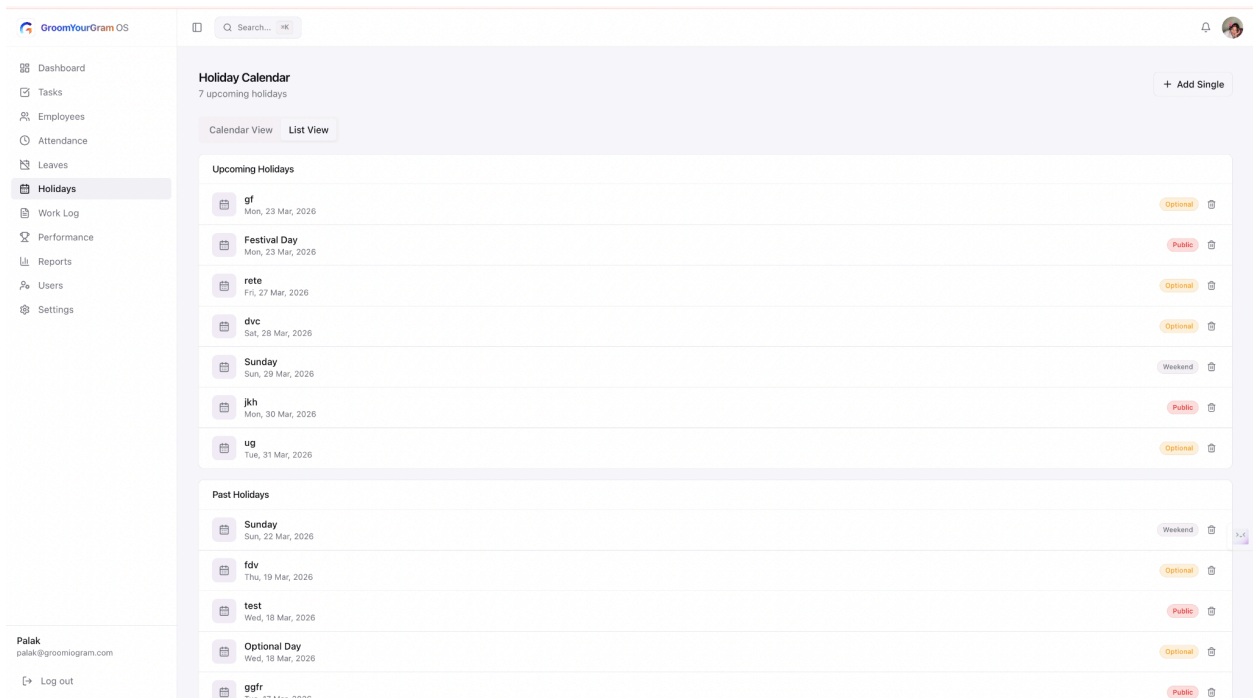

- Click Mark X Dates as Holiday

- Choose a name and type

3. Mark all Sundays

- Click Mark All Sundays (creates weekend/holiday entries for Sundays)

4. Delete a holiday

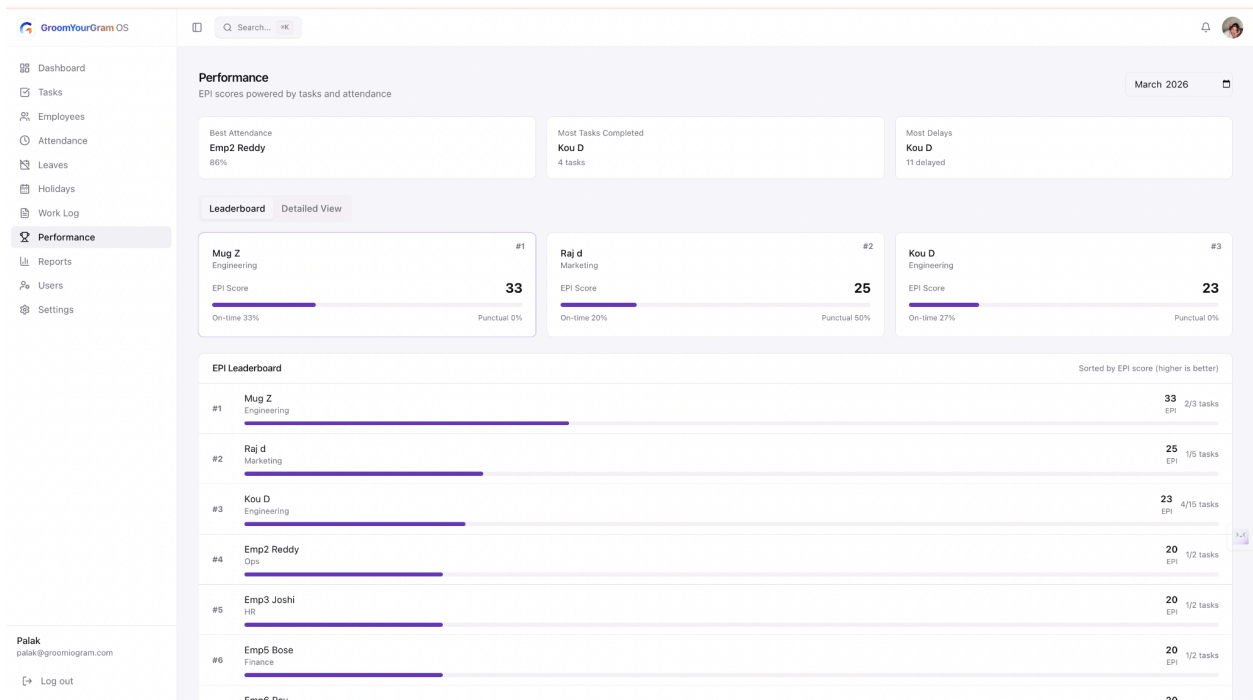

- In the list view or calendar, use the delete icon next to a holiday entry

Important notes

- Holidays help the system properly compute leave days and attendance expectations.

8) Performance (EPI leaderboard and comparisons)

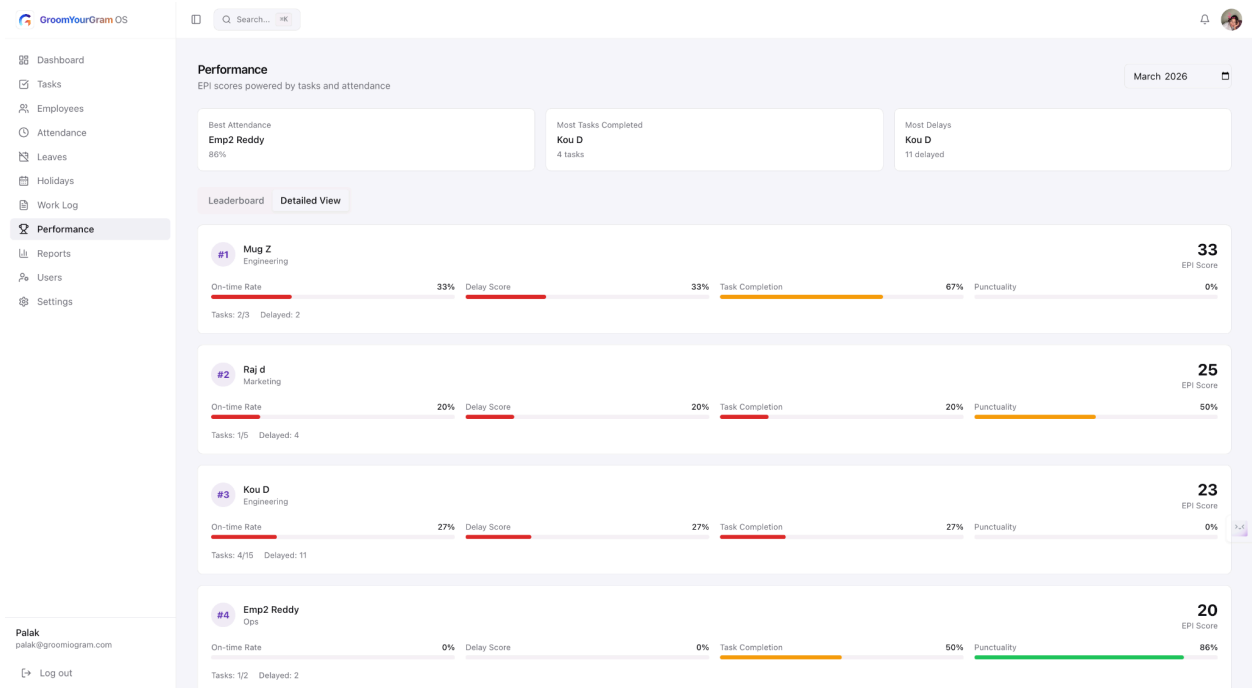

Go to: Performance

What you can do (Founder/Super Admin)

1. See the EPI leaderboard (highest performers at the top)
 2. Switch month
- Choose the month and view updated scores

3. Detailed view

- Open "Detailed View" to see how performance is calculated for a user

4. Compare multiple employees

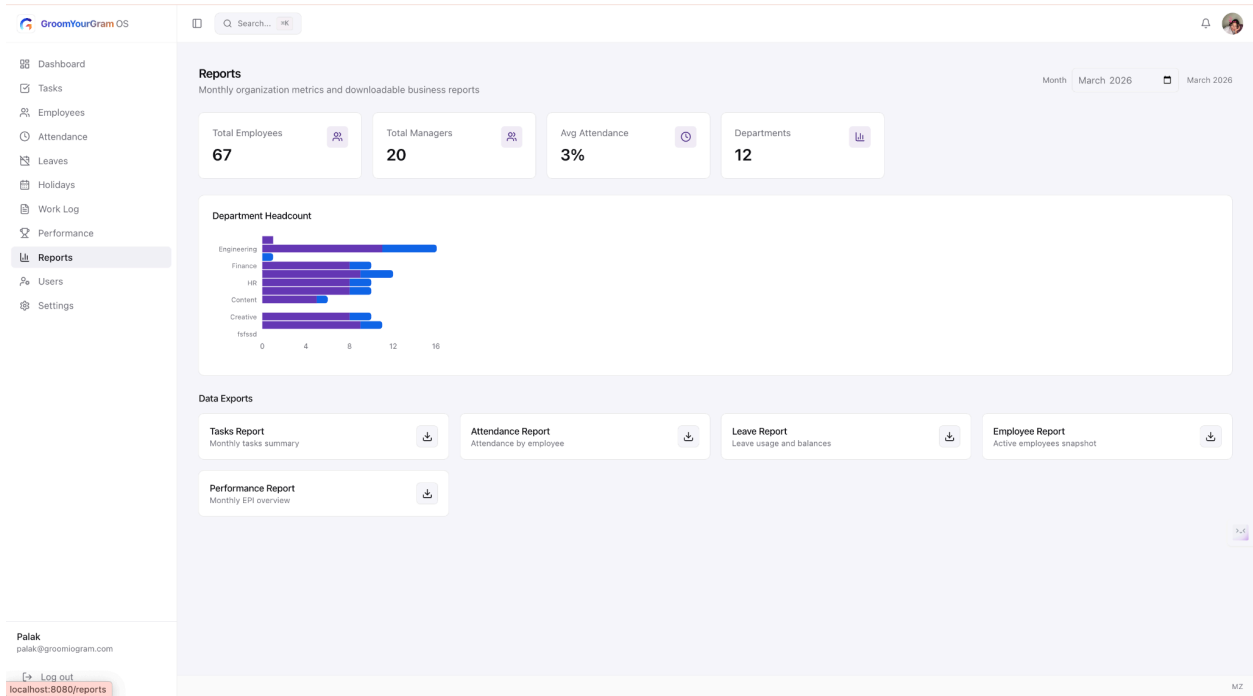

- Select users to compare their scores for the same date range

What "EPI" means (simple)

- EPI is a combined score calculated using:
- Task completion
- On-time completion / delays
- Attendance punctuality

9) Reports (download monthly reports)

Go to: Reports

What you can do (Founder/Super Admin)

1. Pick a month

2. Download reports

- Buttons available:

- Tasks Report

- Attendance Report

- Leave Report

- Employee Report

- Performance Report

3. Formats

- Depending on system availability, downloads may come as PDF or CSV

Important notes

- Reports summarize company metrics for that month.

- Use downloads for sharing with non-app users (Excel/PDF friendly).

10) Settings (brand, permissions, leave limits, performance weights, departments)

Go to: Settings

10A) Brand settings (Founder/Super Admin only)

You can customize the look and feel:

1. Company name
2. Logo upload
3. Primary and secondary colors
4. Theme mode (light/dark)
5. Gradient theme toggle

10B) Permissions matrix (Founder/Super Admin only)

This is your "control panel" for manager abilities.

Use Settings → Permissions to toggle which permissions each manager has, including:

- `View Salaries`
- `Assign Tasks`
- `Approve Leaves`
- `View Reports`
- `Edit Employees`
- `View Performance`
- `Manage Attendance`
- `Create Employees`
- `View Payroll`
- `Manage Holidays`

Simple explanation for non-technical people

- Turning permissions ON/OFF decides what actions managers can see and do in the app.
- Changes reflect immediately after saving.

10C) Attendance configuration (login time window)

You can set:

- Login window start time
- Login window end time (late after this time)

This controls whether attendance is marked as On time or Late .

10D) Leave limits (annual leave caps)

Set maximum allowed leaves per year for each leave type, for example:

- Casual Leave
- Sick Leave
- Paid Leave

10E) Performance weights (EPI formula)

You can tune EPI calculation by adjusting weights for:

- On-time completion
- Average delay penalty
- Total tasks completed

- Attendance punctuality

Weights must add up to 100% .

10F) Departments (department categories)

You can manage department categories used across the system:

- Add a new department
- Remove an existing department

11) User Management (create & control accounts)

Go to: User Management

What you can do (Founder/Super Admin)

1. Create accounts

- Choose Role:
 - Admin (Manager)
 - Employee
- Fill:
 - Name, email, phone
 - Department
 - Salary (optional field depending on workflow)
 - Initial password

2. Deactivate users

- Temporarily disable a user account without deleting it.

3. Reset password

- Generate a temporary password (shown in the app after reset).

Important notes

- The app prevents you from creating another Founder/Super Admin account. (You create Founders only through admin setup processes.)

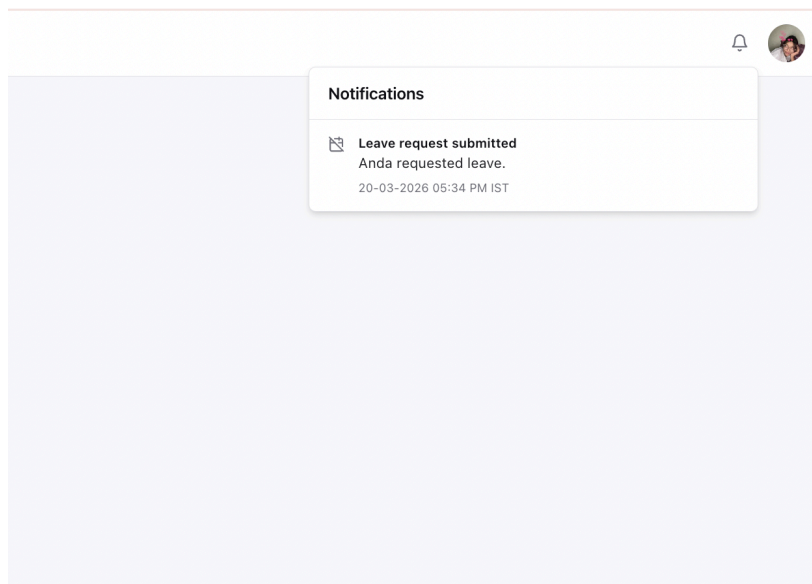

12) Employee profile (update salary, avatar, and view history)

Go to: Employees → click an employee → profile

What you can do (Founder/Super Admin)

- Upload/update avatar
- View employee details (attendance, tasks, leaves)
- Update salary (when salary is enabled for you)
- Change department from the admin UI where available

13) Notifications (bell icon)

You can:

- See alerts like:
- task assigned/completed,

- leave requested/approved/rejected,
- work log reviewed,
- and deadline reminders.
- Mark notifications as read or mark all read.

13) Timeline Requests (sidebar item for everyone)

Add a section covering:

Deadline requests – request a new task deadline; approver (manager/founder) approves/rejects

Suggestions – propose improvements; approver approves; assignee marks complete; comments thread

14) CRM / Sales (for users with CRM access)

Add a new guide section (or a separate “Sales & CRM” guide):

Page	Route	Who sees it
Sales Pipeline	/sales-pipeline	Founder + anyone with CRM access
Leads	/deals	Same
Campaigns	/campaigns	Everyone (data scoped by assignment)

Cover: create/move leads, lock deals, assign ops team, campaign tasks/work logs, field visibility (“Hidden” fields), mark campaign complete (Founder only).

15) Work Log – rewrite this section (important)

Current docs describe old free-text “description + send to manager” logs. The app now works like this:

Primary view: Campaign-linked structured work logs (pick campaigns, enter metrics)

Log Today opens the structured dialog (same flow as checkout work log)

Archive: Legacy text logs (with “send to manager” + Mark reviewed) – collapsible via View Archive

Filters: employee, campaign, date range; Export CSV

Update Employee, Admin, and Founder Work Log sections to match this.

16) Attendance – expand beyond check-in/out

Add:

Lunch/break workflow: break on → break off → post-lunch check-in (auto-lunch when enabled)

Geofencing: office check-in may require location when configured

Work log on checkout: if enabled in Settings, checkout requires logging work first

Calendar codes: OP, OL, A, WFH, H (already partly documented)

17) Tasks – corrections

Add/update:

Employees can create tasks (no Assign Tasks permission needed); they must pick a Request type (e.g. key action, arrange work, follow up, review required, approval needed)

Employees see tasks assigned to them, created by them, or where they're CC'd – not only assigned tasks

Optional fields: output type, campaign link, CC (managers only for CC)

Managers/founders assign to employees and other managers

20) Quick FAQ

Q: Can I approve leaves for anyone?

Yes. As Founder/Super Admin, you can approve/reject pending leave requests for any employee.

Q: Can I start/complete tasks for other people?

You can view any task, but start/complete actions are only available when you are the assigned person .

Q: Can I check in/out as Founder?

The system blocks check-in/check-out for Founder/Super Admin. Use an employee account for your personal attendance if needed.

Q: How do managers get access to approvals/reports?

Go to Settings → Permissions and turn on the required toggles for that manager.
